### Taught Courses

#	Course title	Description	Headlines	Date
1	Phys. & Mech. Prop. of Polymers	Study of mechanical behavior of polymers and their reaction to force field		Spring 2022
2	Fundamental of Process Integration and Design	Understanding the technical aspects of process design, the design steps from the initial raw design to the complete process, and the conceptual design in large projects		Spring 2022
3	Phys. & Mech. Prop. of Polymers	Study of mechanical behavior of polymers and their reaction to force field		Fall 2021
4	Fundamental of Process Integration and Design	Understanding the technical aspects of process design, the design steps from the initial raw design to the complete process, and the conceptual design in large projects		Fall 2021
5	Fundamental of Process Integration and Design	Understanding the technical aspects of process design, the design steps from the initial raw design to the complete process, and the conceptual design in large projects		Spring 2021
